Release 2018.0.6

Bug Fixes

- Publishing tables on an InfoZoom Anywhere Server causes no critical errors. (24.08.2018)
- Creating attribute groups that already contain attribute groups is working. (09.08.2018)
- The online help for the internal chart is displayed. (08.08.2018)

Optimizations

- The database wizard also accesses the system tables of Oracle databases. (24.08.2018)
- List & Label Service Pack 23.003 integrated. (31.07.2018)
- Data about the German Bundesliga season 2017/2018 has been added to the example table. (24.07.2018)
- The installation of Microsoft Visual C++ Redistributable Packages does not require a restart of the PC. (25.05.2018)
- For multi-line attributes, the values are left-aligned if a line break is contained. (22.05.2018)

Release 2018.0.5

Bug Fixes

- Microsoft Visual C++ Redistributable Package for Visual Studio 2013 updated (Microsoft KB 3138367 and article 3179560). (18.05.2018)

Optimizations

- Auto filter in report templates is preserved also for Excel 2007 and above. (16.05.2018)

Release 2018.0.3

Optimizations

- When opening files, you can now set the filter for file types to Excel files, also in the selection wizard. (2018-04-19)
- For the data sources CSV file and FOX file, it is now possible to change the connection data in the database wizard. (2018-02-12)
- For the data sources CSV file and FOX file, the "Refresh Data Source (Tables)" button is no longer displayed in the database wizard. (2018-02-12)

Bug Fixes

- Numeric values are now correctly transferred to Excel when the typographic apostrophe is used as thousands separator. (2018-04-26)

- Reloading data from a FOX file no longer prompts the password dialog. (2018-04-09)

- The properties of a join can now also be adjusted in the database wizard if an SQL command not supported by the database driver has been executed. (2018-03-27)

- Fixed localization bug in the database wizard. (2018-03-26)

- All icons are now displayed correctly in the Polish and Italian versions. (2018-03-02)

- Using the "Undo" function no longer leads to a critical error if this undoes the "Find and Replace" function, which replaced the values found with an empty string. (2018-03-01)

- Queries from older InfoZoom files containing a search for "\n" are now executed correctly in InfoZoom Desktop 2018. Such queries in InfoZoom Desktop 2018 can now also be saved to older file formats. (2018-02-06)

Release 2018.0.1

Optimizations

- InfoZoom Desktop 2018 released. (2018-01-22)
