

Release 2022.0.4

Optimizations

- The Formula 1 sample table is now up-to-date with the 2021 season.
- The Bundesliga sample table is now up-to-date with the 2021/2022 season.
- Temporary licenses are now explicitly displayed in the dialog for the selection of the product variant.
- InfoZoom is now delivered with CodeMeter Runtime 7.40.

Troubleshooting

- When a table is inserted into a template, the new attributes are now indented correctly.
- When queries are imported, the disabled *Append not mapped fields to the table* option no longer runs into an error.
- .xlsx files can now also be imported when the file extension is written in upper case.

Release 2022.0.1

Improvements

- InfoZoom Desktop 2022 released. Further information about the new features can be found in the document *Whats_New_en.rtf*.
