

Release 2016.0.8

Bug fixes

- Numeric values are now correctly transferred to Excel when the typographic apostrophe is used as thousands separator. (26.04.2018)

Release 2016.0.7

Bug fixes

- Fixed an error during the initialization of an interactive chart. (23.10.2017)
- When updating data no longer new unnecessary identifiers will be generated. (04.08.2017)
- The circumflex character is now being stored correctly as a delimiter. (21.07.2017)

Release 2016.0.6

Improvements

- Implemented some minor improvements for interactive charts. (11.07.2016)
- The InfoZoom Desktop main window is now being displayed on the screen it was closed before. (06.06.2017)
- Attributes of type link are now being computed more efficiently. (30.05.2017)
- Summaries of type count are now being computed more efficiently. (30.05.2017)
- Calculation of derived attributes is now performed faster in some special cases. (31.03.2017)

Bug fixes

- Working with the queries list while displaying two tables side by side no longer causes a critical error on Windows 10 systems. (07.03.2017)
- When creating a table section is solely based on a multiple values attribute a new key attribute is created automatically. Thus there won't be displayed any chinese symbols in column headers any longer. (13.02.2017)
- The current restriction of a table is now refreshed correctly in internal reports. (14.12.2016)

Release 2016.0.5

Improvements

- Search and Replace consumes significantly less memory. (22.11.2016)

Bug fixes

- The Link and Join dialog displays a horizontal scrollbar in case names of tables are very long. This makes identifying tables much easier.
(20.06.2016)
- Bounds of restricted numeric value ranges are recalculated regularly since the format of an attribute may change at any time.
(20.06.2016)
- Invocation of the Excel wizard no longer causes an error in versions InfoZoom Desktop Enterprise 64-Bit, InfoZoom Desktop OEM 64-Bit and InfoZoom Desktop OEM Protected 64-Bit.
(18.08.2016)
- Imports of queries containing interactive charts no longer cause an error in InfoZoom Desktop 64-Bit versions.
(22.08.2016)
- Interactive charts no longer freeze on zooming into value ranges.
(25.10.2016)
- Usage of the Excel wizard within planned Windows tasks no longer causes an error.
(17.11.2016)

Release 2016.0.4

Bug fixes

- Redefining an attribute no longer causes an exception.
(24.03.2016)
- The progress bar no longer decreases if multiple cores of the cpu are used to perform a calculation.
(07.04.2016)
- The sort order of classification attributes and case differentiation attributes is being preserved when using the „Save objects as“ function.
(12.04.2016)
- Added missing localized resources.
(20.04.2016)
- Fixed incorrect localized resources.
(21.04.2016)
- It is now possible to create .xlsx files with more than 65,535 rows or more than 255 columns when using the internal reporting engine via batch scripts.
(25.05.2016)
- Updated the Bundesliga sample table.
(27.05.2016)
- „Search and Replace“ now works for \$ symbols again.
(31.05.2016)
- The internal reporting engine no longer causes buffer overflows if big numbers are used.
(01.06.2016)
- The automatic determination of attribute formats no longer causes an exception if a value solely consists of dots („.“).
(10.06.2016)

Release 2016.0.2

Improvements

- A critical error no longer occurs in very large tables when attribute values are recalculated while the corresponding value list is open.
(15.01.2016)
- The .NET Framework 4.0 is now installed correctly if not already present on the computer.
(08.02.2016)
- The Visual C++ 2012 runtime components are no longer reinstalled if already present on the computer.
(08.02.2016)
- Find and Replace actions on a key attribute no longer invalidate the key.
(09.02.2016)
- Overflow no longer occurs for large values in interactive charts.
(18.02.2016)
- Changing an attribute format from numeric to string now automatically changes a related interactive chart to a frequency chart.
(18.02.2016)
- Changing an attribute format now automatically changes the axis labels in an interactive chart.
(18.02.2016)
- The metadata table for an InfoZoom table now shows up to 9,999 characters in the Details attribute.
(02.03.2016)

Release 2016.0.1

Improvements

- InfoZoom Desktop 2016 released.
(14.01.2016)
