● = Yes
○ = No

1 = InfoZoom OEM Edition reads and writes only its own FOX file format.
2 = Requirement: Excel as of version 2007 must be installed on your computer.
3 = Requirement: Office as of version 2007 must be installed on your computer.
4 = Optional

5 = Restricted, reporting functions cannot be used.
6 = Optional List & Label Viewer
7 = Optional List & Label Viewer/Designer
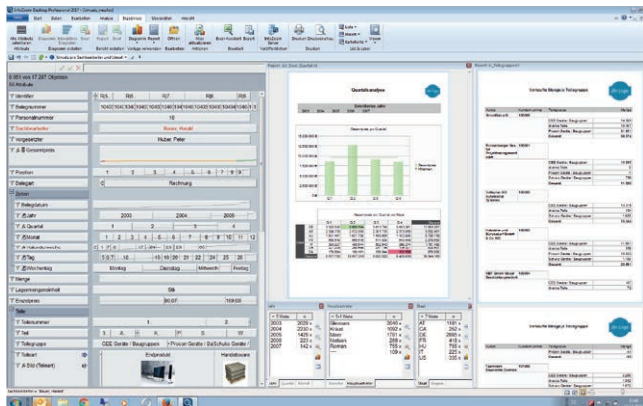

What's New
in InfoZoom
Desktop 2017?

New Functions

List & Label Component:
A New Era of Reporting

The optional List & Label component opens up a whole new world of reporting in InfoZoom. Anything is possible! Generate individual, demand-based reports and effortlessly tailor them to your company's needs. Be it with charts, graphics, HTML, gauges, barcodes, labels or forms, the integration of the List & Label module enhances your InfoZoom analyses and takes your reports to the next level.

Thanks to the dynamic link to InfoZoom, your List & Label reports are adjusted to any selection you make.

Drilldown Attributes:
Faster Navigation

Drilldown attributes are the fast way to navigate through your data: you can conveniently zoom into a hierarchy of attributes and out again. This link is dynamic and is changed with each zoom in to the subsequent attribute within the drilldown attribute group.

This allows you to zoom further and further into the values until you have reached the lowest level. It is also possible to use analysis groups as drilldown attribute groups.

Data Sources and Processing of Results

Import →	Export →
Files Text/CSV files, and native support of the Excel format	Files Text/CSV files, and native support of the Excel format
Databases Microsoft Access, SQL Server, and virtually all other ODBC databases	Office Actively connected Office files thanks to seamless integration
Data Warehouse Native support of Microsoft Analysis Services	InfoZoom Server Publishing of analysis data, e.g. for Scout users
	.NET Data Provider Access to InfoZoom as .NET data source
	List & Label (optional) – Exporting reports, labels and cards as PDF, PPT, XLS and other formats
