### InfoZoom and InfoZoom Product Variants

InfoZoom Product Variants

Expanded product variants

Many product variants now feature the report tool List & Label as new report component. The two functions List & Label Designer and List & Label Viewer are optional components of InfoZoom. Where the components are available, the following applies: If the component was not already purchased, it comes as a free demo version with the product variant. The use of this demo version is limited to 30 days starting with the purchase date.

Expanded functionality: Using files of the proALPHA Analyzer

Files that were created with the proALPHA Analyzer can now also be used in the following product variants:

- InfoZoom Desktop Professional and InfoZoom Desktop Business  
Here you can open and save the files.
- InfoZoom Desktop Viewer Plus  
Here you can open the files.

Expanded functionality: Saving tables for the proALPHA Analyzer in old file formats ▶ more

Tables can now be saved for the proALPHA Analyzer down to version 7.0.

### Setting Up the Work Environment

Docking Windows to Other Windows

New functionality: Maximizing windows  
Floating windows (i.e. those not docked to another window), for example value lists, can now be maximized and minimized as usual in Windows. For this purpose, the corresponding buttons were added to their title bars.

## Data Import

Data Import Using the Database Wizard    New functionality: Saving the arrangement of source tables

When the database wizard is closed, the arrangement of the source tables is now saved and will be loaded again when the database wizard is opened the next time.

## Researching Data

Focusing Objects    New attribute category: Drilldown attribute

**Top**

With a Drilldown Attribute, you can conveniently zoom into a hierarchy of attributes (drilldown) and out again (rollup).

Topic: Drilldown Attributes

Defining Queries    Expanded functionality: Creating reports and charts with queries

You can now include the creation of reports with List & Label into queries.

Topic: Creating Reports and Charts

## Saving and Outputting Data

Saving Files    New functionality: Specifying the standard file format

For saving InfoZoom tables and InfoZoom reports, you can now defined a file format as standard file format. For this purpose, the Standard File Format selection field was added to the Options window. The selection field is available in the following product variants:

- InfoZoom Desktop Professional
- InfoZoom Desktop Business

Topic: Standard File Format

## Creating Reports and Charts

Creating Reports    New functionality: Creating reports with List & Label

**Top**

The report tool List & Label is available as new report component. The creation of reports with List & Label encompasses the following functions:

- Defining report templates with the List & Label Designer
- Viewing and outputting reports in the List & Label Viewer

Topic: Creating Reports with List & Label

## Command Line Parameters

Command Line Parameters for Reports    New functionality: Automating the creation of List & Label

You can automate the creation of List & Label reports using existing command line parameters. The following command line parameters are

available for this:

- -report
- -printreport
- -savereport

Topic: Reports

## Sample Tables

Sample Changed sample tables  
Tables

ErsteBundesliga.fox	<p>The delivery of InfoZoom Desktop includes the "ErsteBundesliga.fox" sample table ("Other/Football" folder). Data about the German Bundesliga season 2015/16 has been added to the example table. The images of the club logos were removed.</p>
FormulaOneSample.fox	<p>The delivery of InfoZoom Desktop includes the "FormulaOneSample.fox" sample table ("Other/Formula One" folder). Data on the Formula 1 season 2016 has been added to the sample table.</p>
Sales.fox	<p>The delivery of InfoZoom Desktop includes the new "Sales" sample table ("Sales Analysis/Electronics Retailer" directory). The following have been added to the sample table:</p> <ul style="list-style-type: none"><li>• Example of a Drilldown Attribute</li><li>• New query "Total Price per Quarter and Country with List &amp; Label". The query creates a report based on a List &amp; Label report template. The report shows a chart "Total Price per Quarter" and a crosstab Total Price per Quarter an Country".</li></ul>
